

## PRODUCT SPECIFICATIONS

|                       |                                   |
|-----------------------|-----------------------------------|
| Product Number:       | T1026                             |
| Product Name:         | 2,4,6-Trifluorophenylboronic acid |
| Formula:              | $C_6H_4BF_3O_2$                   |
| Molecular Weight:     | 175.90                            |
| C.A.S.:               | 182482-25-3                       |
| Specifications:       |                                   |
| Assay (by Titration): | 97 – 103 %                        |
| FTIR:                 | To Match Standard                 |
| Physical Properties:  |                                   |
| Appearance:           | Off White Powder                  |
